### Part III DETAILED ACTION

Claims 1-26 are currently pending.

#### Restriction Requirement

Restriction to one of the following inventions, classified in class 707, in general, is required under 35 U.S.C. 121:

- I. Claims 1-6,7-11 , drawn to method of generating a virtual library *in silico*.
- II. Claims 12,13, drawn to method of identifying compounds.
- III. Claims 14-26, drawn to method of storing information.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as independent and/or patentably distinct methods. The methods have different effects and require different steps; for example, Group II requires steps of adding fragments in synthetic rounds and tracking addition of fragments, not required for Groups I, III; Group III requires linking together fragments of all compounds, not required for Groups I, II.

Art Unit: 1631

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
